UN0012, UN0014, AND UN0055 AS LIMITED QUANTITIES BY INTERNATIONAL AIR

Shipments of the following products as a limited quantity by international air are forbidden:

UN0012, Cartridges, small arms, 1.4S
UN0014, Cartridges, small arms, blank, 1.4S
UN0055, Cases, cartridge, empty with primer, 1.4S

Unlike road, rail, domestic air, and domestic or international vessel transport, these products are forbidden to ship as a limited quantity by international air.

For packages meeting US LQ requirements, it is permissible to have the surface LQ mark on the package for UN0012, UN0014, or UN0055 for international air transport. This is required when shippers desire relief from the 25 kg shipment limitation imposed by USG-13. However, these international air shipments of UN0012, UN0014, and UN0055 are offered as fully regulated 1.4S, and not as LQ. The LQ mark is on the package to avoid USG-13's shipment limitation, and is allowed and ignored in the air regulations. See IATA section 7.1.5.6 and Figure 7.2.A.

Use the Transport Data Sheet for 1.4S shipments of [UN0012](#), [UN0014](#), or UN0055 via international air for more information.
